Questions about the Course

How useful was the recitation for achieving the goals of the course?

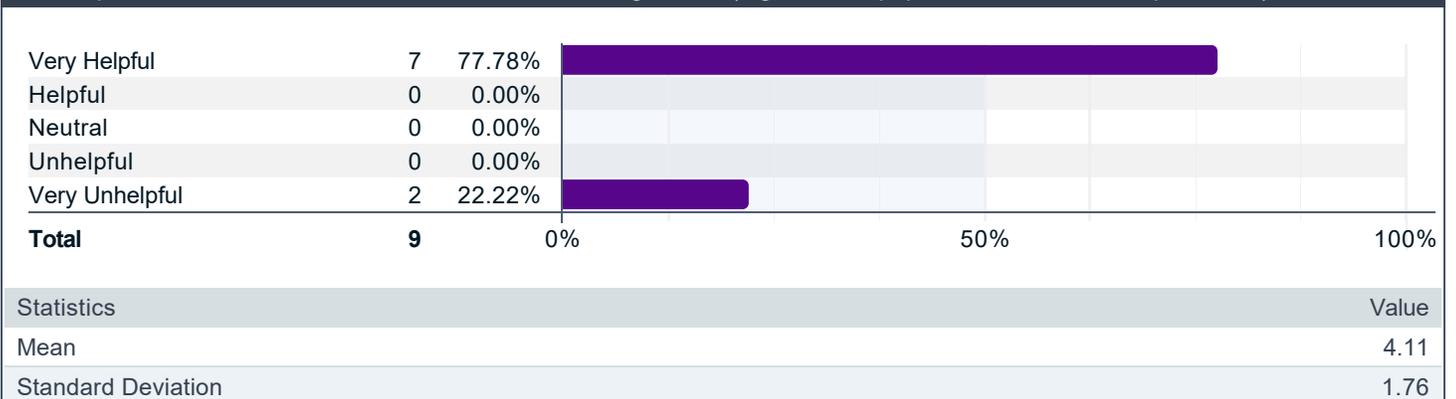

Questions about the Instructor

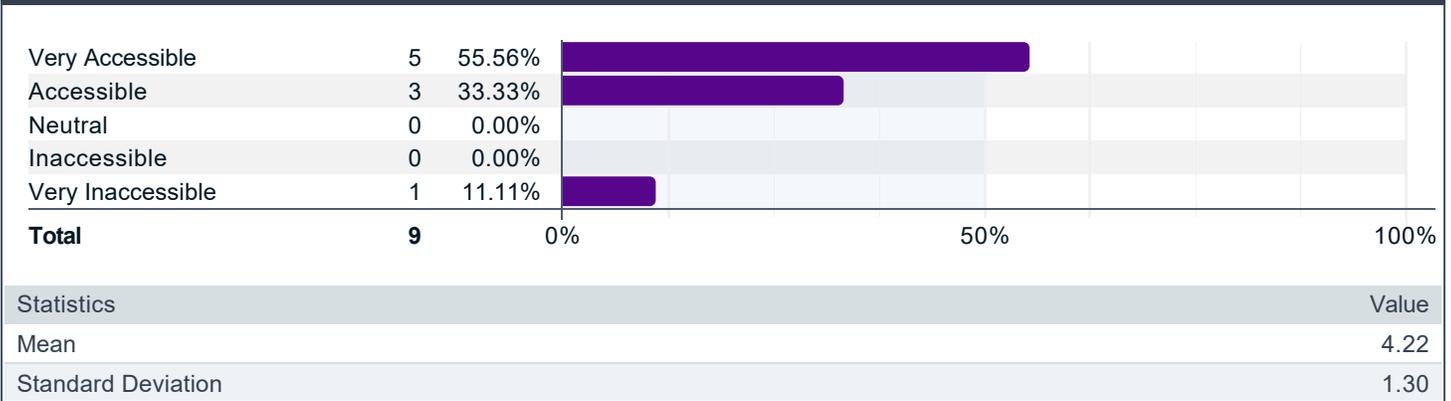

Overall, how effective was the recitation instructor at helping you learn?

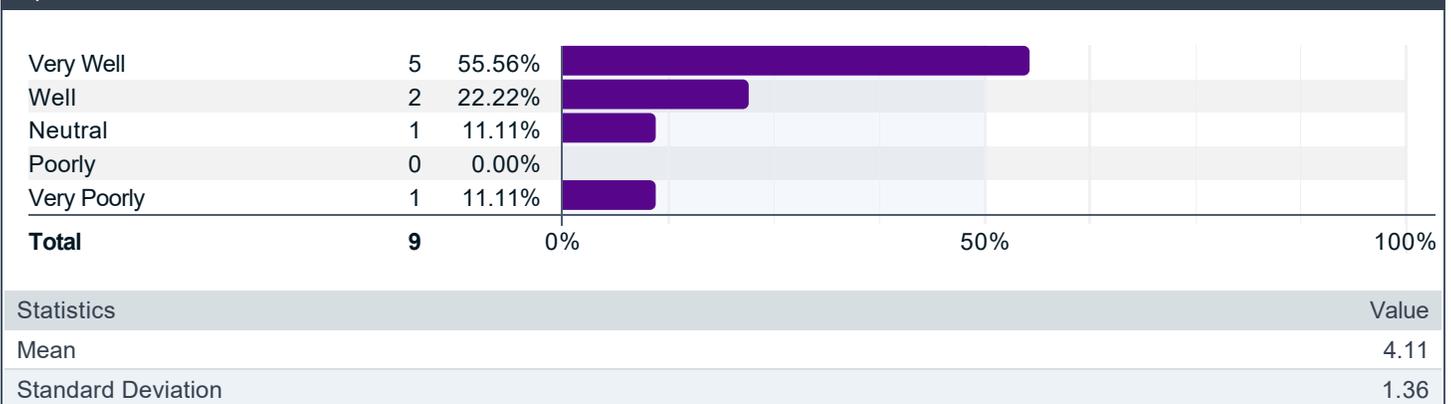

How helpful was the recitation instructor feedback on assignments (e.g., exams, papers, homework, lab reports, etc.)?

How accessible was the recitation instructor to students (e.g., via e-mail and office hours)?

How well did the recitation instructor create an environment that promoted the success of students with diverse backgrounds and experiences?

Is there anything else you would like to share with the INSTRUCTOR?

Comments
 Thank you so much for helping me understand the course and always reachable during the office hours!

Instructor Comments

Describe the one best thing about the lab section or the instructor that was effective in helping you learn. If you could suggest one thing to improve the section, what would it be?

- The lab section was ineffective in helping me learn. I felt like there was a disconnect between the professor and lab instructor.
- He was very good and explained the subject very clearly.
- He explain question clearly.
- He gives student proper time to understand the maths.

Comments
 Its interactive nature. It helped me pay attention and enjoy the content more
 the hand written notes (going through step by step) during the recitations were very helpful for preparing for exams. The recitation notes were also very useful

If you could suggest one thing to improve the recitation, what would it be?

Comments
 If possible, it would be nice to extend the material to real life situations where the theories apply/to what extent they apply

Comments
Felipe is very nice and explains every single question carefully.
Clear and organized explanation to practice problems
many materials to learn about
The step-by-step explanations of various economics topics were effective in helping me learn different topics and various methods of approaching certain economics problems in both homework and tests.

If you could suggest one thing to improve the recitation, what would it be?

Comments
The TA sometimes goes too fast. He should make sure everyone catches up.
I think Felipe could improve his handwriting on the letter "k". I sometimes confuse it with "h".
more explanation of the material when providing the answers
I would improve on some explanations (concept-wise) on some economics topics because I felt quite lost on some of them and I had to go back to recitation notes for full answers.

Instructor Comments

Describe the one best thing about the course or the instructor that was effective in helping you learn. If you could suggest one thing to improve the course, what would it be?

- Doing all the math out by hand with explanations instead of just showing powerpoint slides is extremely helpful for keeping the lectures going at a reasonable pace and understanding the material in general. It would be better if the syllabus could include the due dates for major problem sets so students can plan work schedules, etc. well in advance according to those deadlines. It would also be great if problem sets were distributed further in advance of due dates.
- The recorded review sessions were really helpful, and problem set solutions were generally really clear. I only wish the TA had more office hours later in the day since I am in a different time zone.
- Felipe was always willing help to whenever there was a question and/or concern regarding the course material. No suggestions for improvement.
- Very helpful, really understands the material and is willing to help students
Quick to reach and quick to reply
- This class was overly hard. The hardest class in Economics that I have ever taken or have seen anyone take. This is at a grad school level and hurt my GPA.

Instructor Comments

Describe the one best thing about the course or the instructor that was effective in helping you learn. If you could suggest one thing to improve the course, what would it be?

- helpful ta
- Helpful !
- NA
- More feedback
- I didn't interact much with the instructor
- Overall it broadens my view on economics. Thank you for teaching the class.
- The assistant was so helpful in getting the problem sets back to us in a quick time! That was really conducive to learning and the process of the course! I really appreciated it!
- No specific feedback but overall the TA certainly helped in order to understand the coursework better.
- I really do think the informative answer key and the problem sets helped a lot in my learning.
- Felipe was one of the best TA's I have had the pleasure of interacting with during my time at NYU. Thank You.
- na
- The professor has the nicest office hour

Describe the one best thing about the course or the instructor that was effective in helping you learn. If you could suggest one thing to improve the course, what would it be?

- Everything is perfect.
- Should have a more divided grading system.
- was there during group sessions
- N/A
- homework feedbacks and group discussions
- Please return homework on default rather than making student writing email to require them
- N/A
- He was really nice and helpful during study groups. About the homework, I personally really disliked how it is only marked with three different levels and that there was no feedback about where we made mistakes. (sometimes I get to realize where I made mistakes with the answer keys but sometimes not) I know we can always email to ask for the copy which is nice, but I think directly giving out feedback might be better even though it's more work.
- Maybe go over more sample to practice in the class
- kk
- Don't go on strike.
- Patient guy.
- Good

CFE COMMENTS FOR

2021 FALL

PROFESSOR MOSER

1. Please comment on the course materials - readings, handouts, PowerPoint slides, etc. Include which you found most and least useful.

- Course materials were always thorough, and most useful were Professor Moser's papers that were provided to read.
- At first I was doing all the readings but then I realized that only some parts are useful for the data labs. The presentations are interesting but sometimes a bit long
- The readings are hardcore and informative. The data lab instructions are always detailed. Probably uploading the data lab PowerPoint and making the data descriptions easier to read. Might be due to the limit of the Brightspace though.
- PowerPoints somewhat helpful, DataCamp sometimes not relevant to Lab needs.

2. Which topics and class sessions did you find most and least valuable? What other topics do you suggest the instructor include?

- I think every section was valuable in its own right, as they all contributed to making my understanding of the economics of innovation more well rounded and wider scoped.
- I liked all topics
- The course is overall informative and intriguing.
- R basics were helpful in addition to regression models.

3. Do you have any feedback for your Teaching Fellow? (if you did not have a TF, please enter "NA").

- Felipe was super helpful, couldn't ask for much better.
- Felipe was helpful but I sometimes he acted nicer in class than in his office hours
- Felipe is super nice and helpful. He always gives out a clear instruction in the data lab.
- Responsive, supportive, and thorough.

4. Do you have any other comments for your instructor or additional constructive feedback that would help improve future students' learning?

- n/a
- The coding was hard, especially at the beginning. Maybe some data labs could only be based on the readings and not so much on the code.
- Probably making the course more organized, since it seems a little bit disorganized at first. But the helpful learning environment made this matter less.
- n/a

5. Provide any comments or suggestions in the space below.

- Professor Moser was great this semester. It's clear that she is passionate about the subjects covered in class, as they are often her own work, which carries over to our learning because she explains it so well.
- I really enjoyed the Professor's presentations but I found the data labs challenging. The extra credit data lab was extremely useful to boost my grade. Overall, I really enjoyed the class :)
- The professor is smart, very academically capable, and reasonable. It's always a good experience talking to her.

Instructor Comments

Describe the one best thing about the course or the instructor that was effective in helping you learn. If you could suggest one thing to improve the course, what would it be?

- Very well-informed. He was much better than a lot of summer professors in terms of grading on time, but could use a little promptness there.
- Have recordings that allow me who is in a different time zone to reach the comprehensive course materials.
- The powerpoint slides include useful information about the topics we learn, and the additional readings help me understand some concepts better. I would suggest that we could have some discussions on some difficult questions in the homework assignments to enhance my understandings.
- The remove format of this course made it much more difficult. Some lecture material (such as slides) was almost written too concisely, so that it's very difficult to learn its meaning/application without rewatching its respective lecture or researching online. Though it's not the course's responsibility to hold our hands, it would help if lecture notes were a useful source to study from.
- The writing part is sometimes too heavily compared to multiple choice and T/F. But overall great class and great instructor.

Describe the one best thing about the recitation section or the instructor that was effective in helping you learn. If you could suggest one thing to improve the section, what would it be?

- Nothing specific
- NA
- More problems that are actually in-line with what we will be tested on. Nothing in this class lined up. Recitation exercises != Problem set exercises != midterm exercises... I was LEARNING stuff while take my midterms. That's not supposed to happen on show's the professor's inability to organize a coherent set of exercises
- More examples of questions that may come up with the midterms and finals.
- No comment
- Didn't help a lot with the actual exam material, but that can be attributed to the disconnect between the exams and homework problems.
- Recitations are good preparation for problem sets.
Since the exams are very hard and sometimes different from exercise question, it would be great if we can go over similar questions in recitation.
- He definitely knows the material well and tries hard to convey it to us during recitation. Sometimes it can be hard to follow but it is clear that he is passionate and teaches.
- Nice Guy
- Felipe's kindness was immeasurable!
- preview of next week's content
- N.A
- did a good job of going over the weekly problems but didn't do much else
- The recitation was really helpful in connecting what we learned with the real problems.
- Felipe was great, he thoroughly went over all the material and wanted to make sure everyone understood!
- hard
- Not reading all the answers directly from the slides. We are already struggling cause of how difficult and extra the material is. Too much to cover in too little time, resulting in the TA recording extra videos for us to watch cause he can't finish the portion in the time allotted to this class.

- Felipe talked super fast and his writing was hard to read. It was super hard to keep up with the recitations and the feedback we received on the exams was minimal (all we had was random percentages here and there to indicate how many points we actually got which is not helpful at all). Also, simply saying something super fast and saying, "any questions?" and then moving on is not a way of encouraging questions...students may still be copying down and digesting everything you just said...
- In recitations, TA goes over all the problems and explains the materials clearly. It is helpful to learn how to do the actual problem which enhances my understanding of the course material. The TA has been responsible for helping students to learn.
